Aeroball - Risk Assessment

The risk assessment ratings for each identified hazard, the score for the likelihood of its happing is multiplied by the score of the severity of the injury.
(For example, likelihood 2 multiplied by Severity $5=10$ medium).
The Risk assessment is to identity hazards, value the risk and the potential harm and whom to. Have an action plan to prevent the risk and a final risk value.

| Hazard | Who | Existing <br> Risk <br> Value | Action to prevent | New <br> Risk <br> Value |
| :---: | :---: | :---: | :---: | :---: |
| Slips, Trips \& Falls | Participants Instructors Leaders | $5 * 5=25$ <br> High | Be made aware of any steps or objects on the ground. Shoe laces to be tied up. <br> Clear Briefing/Instructions, full understanding. <br> Appropriate Footwear to be worn. <br> Recommend No running in the area. <br> No climbing fences. <br> No climbing Trees. <br> Instruction/advice given on mounting Aeroball unit <br> Woodchip topped up to cover concrete pad | $\begin{aligned} & 2 * 5=10 \\ & \text { Med } \end{aligned}$ |
| Failure of equipment | Participants Instructors Leaders | $5 * 5=25$ <br> High | A bi-weekly inspection is done by staff. <br> Pre-use inspection done by staff. <br> Any damaged to be reported to Walton Firs Staff by group leaders | $1 * 5=5$ <br> Low |
| Failure of structure | Participants Instructors Leaders Spectators | $5 * 5=25$ <br> High | Arborists report on neighbouring trees Bi-Weekly visual inspection from ground level by qualified/trained staff. <br> Before use inspection done by staff. | $1 * 5=5$ <br> Low |
| Entanglement | Participants | $5 * 5=25$ <br> High | Ensure all Long hair is tied up/back as appropriate. <br> Jewellery to be removed as appropriate <br> Clear Briefing/Instructions, full understanding. <br> No climbing trees. <br> Participants briefed to keep hands inside pod and not near <br> springs <br> Springs covered with protective mats | $2 * 5=10$ <br> Med |
| Falling objects | Participants <br> Instructors <br> Leaders <br> Spectators | $5 * 5=25$ <br> High | Clear Briefing/Instructions, full understanding. Equipment to stay inside the trampolines Arborists report on neighbouring trees | $2 * 5=10$ <br> Med |
| Behavioural Problems | Participants Instructors Leaders | $5 * 5=25$ <br> High | Clear Briefing/Instructions, full understanding. <br> Ratio's 12:1 maximum. <br> Site behavioural policy. <br> 1 participant per trampoline section <br> No Somersaults/flips | $2 * 5=10$ <br> Med |
| Wildlife | Participants Instructors Leaders | $\begin{aligned} & 5 * 5=25 \\ & \text { High } \end{aligned}$ | No food permitted in the area. <br> Area checked before use. <br> Allergies (controlled by group leader) <br> Pest control where appropriate. | $1 * 5=5$ <br> Low |
| Weather | Participants Leaders Instructors | $5 * 5=25$ <br> High | Activity not to be used in lightning weather. Activity not to be used in strong winds Clear Briefing/Instructions, full understanding. Appropriate lighting when required. | $1 * 5=5$ <br> Low |

|  |  |  | Not to be used in heavy snow - Roof removed to stop build up <br> Units are anchored to the ground |  |
| :--- | :--- | :--- | :--- | :--- |
| Environment | Participants <br> Leaders <br> Instructors | $5 * 5=25$ | Floor covering to be made safe, removal of any objects that <br> cause hazards as appropriate. | $1^{* 5=5}$ |
| Covid-19 <br> Instructor Contact <br> (Positive) | Participants <br> Leaders <br> Instructors | $5 \times 5=25$ | High | 1 distance if instructed <br> Where not possible, face masks to be worn |
| Covid-19 <br> General <br> Contact/Arrival |  | Removed | Low | Med |

This risk assessment is written in accordance with the operating process and procedures.
