

Bushcraft Fire Lighting – Risk Assessment

The risk assessment ratings for each identified hazard, the score for the likelihood of its happing is multiplied by the score of the severity of the injury.

(For example, likelihood 2 multiplied by Severity 5 = 10 medium).

The Risk assessment is to identity hazards, value the risk and the potential harm and whom to. Have an action plan to prevent the risk and a final risk value.

Hazard	Who	Existing	Action to prevent	
		Risk		Risk
		Value		Value
Slips, Trips & Falls	Participants	5*4=20	Be made aware of any steps or objects on the ground.	2*4=8
	Instructors		Be aware of surroundings.	
	Spectator	High	Shoe laces to be tied up.	Med
			Appropriate Footwear to be worn.	
			Clear Briefing/Instructions, full understanding.	
			No running in the area.	
Slips, Trips & Falls	Participants	5*5=25	Be made aware of any steps or objects on the ground.	1*5=5
(Head Injury)	Instructors		Be aware of surroundings.	
	Spectator	High	Shoe laces to be tied up.	Low
			Appropriate Footwear to be worn.	
			Clear Briefing/Instructions, full understanding.	
			No running in the area.	
Slips, Trips & Falls	Participants	5*5=25	Be made aware of any steps or objects on the ground.	1*5=5
(Into Fire)	Instructors		Be aware of surroundings. (The Fire Circle)	
	Spectator	High	Shoe laces to be tied up.	Low
			Appropriate Footwear to be worn.	
			Clear Briefing/Instructions, full understanding.	
			No running in the area.	
			Instructor will clear and check the fire circle before use (RVI)	
Chemicals	Instructors	5*5=25	Keep in small quantities and away from participants and	1*5=5
	Participants		Spectator.	
	Spectator	High	Instructors have training in how to safely use the chemicals	Low
		High	(asthma)	
Failure of equipment	Participants	2*2=4	Bi-weekly checks completed by trained staff	1*2=2
	Instructors		Before/During use checks completed by instructor	
	Spectator	Low		Low
Burns	Participants	4*5=20	Keep all fires controlled and small.	2*5=10
	Instructors		Give Participants relevant training and supervision while taking	
	Spectator	High	part.	Med
			Use safer methods during practice.	
			Instructor given First Aid Kit	
Cuts, Scrapes, Bruises	Participants	2*2=4	Give proper instruction on how to use flint and steels.	1*2=2
	Instructors		Supervise use of the equipment at all time.	
	Spectator	Low	Instructor given First Aid Kit	Low
Behavioural Problems	Participants	5*5=25	Clear Briefing/Instructions, full understanding.	2*5=10
	Instructors		Yellow/red card system.	
	Spectator	High	Ratio's 12:1 maximum.	Med
			Group leader must be present to control group behaviour.	
			Site behavioural policy.	
Wildlife	Participants	5*5=25	No food permitted in the area.	1*5=5
	Instructors		Area checked before/during use.	

	Spectator	High	Allergies (controlled by group leader)	Low
			Pest control where appropriate.	
Weather	Participants	5*5=25	Activity not to be used in lightning weather.	1*5=5
	Spectator		Activity not to be used in strong winds.	
	Instructors	High	Clear Briefing/Instructions, full understanding.	Low
			Appropriate lighting when required.	
Environment	Participants	5*5=25	Floor area to be made safe by removing any objects that cause	1*5=5
	Spectator		hazards.	
	Instructors	High	Pre-use checks completed by instructor	Low
			Arborist report on trees	
Covid-19	Participants	5x5=25	1m distance when instructing	2*5=10
Instructor Contact	Leaders		Where not possible, face masks to be worn	
(Positive)	Instructors	High		Med
Covid-19			Removed	
General			Kemoved	
Contact/Arrival				

This risk assessment is written in accordance with the operating process and procedures.

Likelihood of Occurrence	Severity of Harm		
0 = Never	0 = No Harm		
1 = Unlikely	1 = Bumps & Bruises		
2 = Possible	2 = Small Cuts & Lacerations		
3 = A chance	3 = Broken/Fracture of Bones		
4 = Likely	4 = Loss of limb		
5 = Certain	5 = Fatality		

	Severity					
Likelihood	*	1	2	3	4	5
	1	1	2	3	4	5
	2	2	4	6	8	10
	3	3	6	9	12	15
	4	4	8	12	16	20
	5	5	10	15	20	25

Levels of Acceptance					
1-6 Low	=	Acceptable			
7-10 Medium	=	Monitor			
11-12 medium	=	Re-evaluate			
13-25 High	=	Not acceptable
