

Bows n Arrows – Risk Assessment

The risk assessment ratings for each identified hazard, the score for the likelihood of its happening is multiplied by the score of the severity of the injury.

(For example, likelihood 2 multiplied by Severity 5 = 10 medium).

The Risk assessment is to identify hazards, value the risk and the potential harm and whom to. Have an action plan to prevent the risk and a final risk value.

Hazard	Who	Existing Risk Value	Action to prevent	New Risk Value
Slips, Trips & Falls	Participants Instructors Leaders	5*5=25 High	Clear Briefing/Instructions, full understanding. No running across the range. Keeping a clear and tidy range. (clear path from objects.) Being made aware of surroundings including rabbit holes or mole hills. Range layout suitable for use.	1*1=1 Low
Failure of equipment	Participants Instructors Leaders	5*2=10 Med	A weekly inspection is done by qualified/trained staff. Before use inspection done by staff.	2*2=4 Low
