Outdoor Classroom – Risk Assessment

The risk assessment ratings for each identified hazard, the score for the likelihood of its happing is multiplied by the score of the severity of the injury.

(*For example, likelihood 2 multiplied by Severity 5 = 10 medium).*

The Risk assessment is to identity hazards, value the risk and the potential harm and whom to. Have an action plan to prevent the risk and a final risk value.

Hazard	Who	Existing Risk Value	Action to prevent	New Risk Value
Slips, Trips & Falls	All	5*5=25 High	Appropriate Footwear to be worn on site. No climbing on picnic tables. Bins located by main toilet and larger bins in carpark; visitors are requested to keep building tidy. (No littering)	2*5=10 Med
Failure of structures	All	5*5=25 High	Buildings checked on weekly basis.	1*5=5 Low
High Winds/ dangerous weather	All	5*5=25 High	Cancellation of booking or alternate building offered if available	2*5=10 Med

This risk assessment is written in accordance with the operating process and procedures.

Risk Assessment CPD

Note: Site first aid kits including burns kits, and Defib unit are located in the crew hut porch opposite the fridge freezers. These are for use by anyone when needed. These are also checked on a weekly basis.

Likelihood of Occurrence	Severity of Harm
0 = Never	0 = No Harm
1 = Unlikely	1 = Bumps & Bruises
2 = Possible	2 = Small Cuts & Lacerations
3 = A chance	3 = Broken/Fracture of Bones
4 = Likely	4 = Loss of limb
5 = Certain	5 = Fatality

Levels of Acceptance		
1-6 Low	=	Acceptable
7-10 Medium	=	Monitor
11-12 medium	=	Re-evaluate
13-25 High	=	Not acceptable

		Severity				
Likelihood	*	1	2	3	4	5
	1	1	2	3	4	5
	2	2	4	6	8	10
	3	3	6	9	12	15
	4	4	8	12	16	20
	5	5	10	15	20	25
